KLINGER MATHEUS VIEIRA DA SILVA

Frontend Engineer · React & TypeScript

SP — Brazil (UTC-3) kger.matheus.dev@gmail.com LinkedIn · GitHub

PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience in React and TypeScript, focused on performance, interface architecture, design systems and accessibility. I currently work at Up Outsourcing building FluxPrompt AI, an AI agent orchestration platform, and have been a freelance full stack developer on VirtualE for 3 years. Experience in application optimization, refactoring complex architectures, API integration, junior-level back-end (Node.js, NestJS and PostgreSQL), daily use of AI to speed up development, and direct collaboration with international teams in English (upper-intermediate to advanced). Open to remote opportunities (full-time, contract or freelance), in Brazil or abroad.

TECHNICAL SKILLS

Frontend JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Zustand, Context API, xyflow
Styling & UI Tailwind CSS, Styled Components, Material UI, Chakra UI, Radix, Figma-to-code
Testing & Quality Jest, Vitest, React Testing Library, Web Performance, Accessibility (WCAG)
Backend & Data (Junior) Node.js, NestJS, Express, PostgreSQL, MongoDB, REST & GraphQL APIs
Tools & Workflow Git, GitHub, Linux (WSL & Ubuntu), CI/CD, Agile/Scrum, AI-assisted development

PROFESSIONAL EXPERIENCE

Software Engineer — Frontend

Up Outsourcing · Jan 2025 – Present

app.fluxprompt.ai · AI Workflow Platform

- **Cut load time by ~98.9% for agents with 150 nodes,** from 11.4s to 0.13s, using lazy loading and code splitting.
- **Raised canvas fluidity from 4–10 FPS to 60 FPS** on pan, zoom and node-drag operations.
- **Reduced long tasks (>50 ms) by ~97% (1,013 to 28)** and slow frames from 100% to 8% across the 13 interactions tested.
- **Cut JavaScript memory from 236 MB to 18 MB (~92.4%)** and tab memory at startup from 657 MB to 204 MB (~69%).
- **Refactoring the canvas architecture (xyflow),** separating node responsibilities and reducing coupling, aligned with needs discussed with product.
- **Shipped features end to end,** such as adapting the agent logging system and redesigning the layout and admin panel, plus UX/UI improvements that made the product more pleasant and accessible while keeping its identity and the scope agreed with product.
- **Built a design system** that standardized the interface and sped up the team's delivery of new features and redesigns.
- **Build front-end/back-end integrations** with React, TypeScript, Zustand, Node.js APIs and PostgreSQL, and use AI daily (refactoring, research and automation) to deliver in days what used to take weeks, with manual and automated testing.

Full Stack Developer (Freelance)

VirtualE · 2023 – Present

virtuale-wellbeing.com · B2B workplace well-being platform

- **Improved application performance by roughly 3x** by eliminating unnecessary re-renders and memoizing expensive calculations in React.
- **Improved product accessibility:** dark-theme contrast from 1.8–2.7:1 to 6.3–8.7:1 (WCAG AA minimum: 4.5:1), visible keyboard focus on every control and page titles in 6 languages.
- **Strengthened user privacy,** keeping feedback and team insights truly anonymous, and replaced blank screens with clear error states and a “Try again” button.
- **Built features end to end,** from the front end (React, TypeScript, Chakra UI, Zustand) to the API (Node.js, Express, MongoDB): focus timer, daily tracker, team analytics and a language-aware offensive-content filter.
- **Built cross-platform desktop interfaces with React, Electron and Chakra UI,** sharing code between web and desktop apps.
- **Implemented interfaces from Figma designs,** ensuring visual fidelity, responsiveness and consistency with design specifications.

Software Developer

GitStart · Jul 2022 – Jan 2025

hash.ai · app.workflow.design · app.twenty.com · Enterprise-scale React projects

- **Built front-end applications with React and TypeScript for different products,** adapting solutions to the needs of each project.
- **Created and maintained reusable components,** improving visual consistency and making interfaces easier to maintain.
- **Worked with different technologies and frameworks,** including Next.js, Vue and Astro, depending on project demands.
- **Collaborated with international teams and clients** through code reviews, technical alignment and delivery in distributed environments.

EDUCATION

Bachelor's Degree in Software Engineering — *UniCesumar · Dec 2025*

Associate Degree in Systems Analysis and Development — *IFSP · Dec 2019*
